ABOUT ME

Flutter Developer with 4 years of experience building high-performance, scalable cross-platform applications for Android, iOS, and Desktop. Proven track record in delivering large-scale production apps, including ride-hailing platforms, social networking and consultation ecosystems, and educational platforms. Skilled in Clean Architecture, real-time systems (WebSockets, Pusher), video and voice calling, In-App Purchases and payment gateways, and writing native iOS/Android code to extend Flutter beyond its limits.

WORK EXPERIENCE

Flutter Developer - Athr Company June 2025 - Present | New Damietta

- Developing and shipping production-grade Android & iOS applications, including a social consultation platform (Tayseer) and a Quran educational platform (Itqan).
- Writing native iOS & Android code through Method Channels to power Live Activities, payment SDKs, and In-App Purchases.
- Building real-time features using WebSockets and Pusher, plus in-app video and voice calls using Jitsi and ZEGOCLOUD.
- Applying Clean Architecture with Bloc/Cubit to keep large codebases scalable, testable, and maintainable.

Flutter Developer - Webbing Agency Company January 2025 - May 2025 | Nasr City, Cairo

- Delivered customized client applications across diverse domains for Android & iOS from a single Flutter codebase.
- Integrated RESTful APIs, Google Maps, and Firebase services to deliver reliable, feature-rich user experiences.
- Optimized UI/UX responsiveness and cross-platform performance for end-users and service providers.

Flutter Developer - Rmoz Company January 2024 - November 2024 | Mansoura

- Built cross-platform mobile and desktop applications with Flutter, following Clean Architecture and MVVM patterns.
- Implemented real-time features using WebSockets, deep linking, and secure OTP authentication.
- Refactored existing modules to improve performance, stability, and code maintainability.

Flutter Developer - Code Work Company October 2022 - April 2023 | Mansoura

- Developed and maintained Flutter mobile applications, converting UI designs into responsive, pixel-perfect screens.
- Integrated RESTful APIs using Dio and managed application state with Cubit.

PROJECTS

DIRO – Ride-Hailing & Delivery Application AppleStore | GooglePlay

- Engineered a real-time ride-hailing and delivery application (similar to inDrive) featuring dynamic trip booking, fare negotiation, and live order tracking.
- Integrated Google Maps API with optimized live route rendering, interactive polyline mapping, and precise location tracking for seamless driver-passenger navigation.
- Wrote native code (Swift / ActivityKit) via Method Channels to implement iOS Live Activities and Dynamic Island, with persistent Android notifications, allowing users to follow the trip live from the lock screen even after leaving or closing the app.
- Utilized WebSockets for instant state synchronization, real-time driver location updates, and low-latency ride dispatching.

Tayseer Community – Social Networking & Consultation Platform AppleStore | GooglePlay

- Engineered a large-scale platform combining social networking, relationship counseling, session booking, and subscriptions, with two user roles: Consultants and End Users.
- Built a Facebook-like social feed with posts/media sharing, comments, likes, friend connections, and granular privacy settings.
- Implemented real-time chat and voice calling between users and consultants, along with consultation booking and session management workflows.
- Integrated subscription plans using In-App Purchases (Android & iOS) and native payment solutions through Flutter Method Channels.
- Applied Clean Architecture, Bloc/Cubit, and GetIt, with FCM push notifications, Hive/SQLite caching, and Google Maps location services.

Itqan – Quran Memorization & Islamic Educational Platform AppleStore | GooglePlay

- Designed and developed an Islamic educational platform for a Saudi charitable association to manage Quran memorization circles both in-person (mosque-based) and online.
- Engineered personalized learning plans for students, supporting both new Quran memorization and structured revision workflows.

- Integrated real-time online virtual classrooms via in-app video meetings alongside an automated attendance tracking system for physical mosque circles.
- Applied Clean Architecture with Bloc state management to deliver a smooth, reliable experience for teachers, students, and admins.

Altamayouz – School E-Learning Platform (Al-Tamayouz School, Saudi Arabia) AppleStore

- Built an integrated e-learning platform for Al-Tamayouz School in Saudi Arabia, serving students from 1st primary to 3rd secondary based on the Saudi curriculum.
- Delivered structured curriculum lessons with short, focused videos, plus a question bank with model answers, periodic quizzes, and simulated exams including Qiyas preparation.
- Implemented live interactive sessions with specialized teachers and performance reports for students and parents, optimized for both iPhone and iPad.

Sakhr Wasla – Service Marketplace & Escrow Payment Platform AppleStore

- Built a service marketplace for Saudi Arabia connecting clients with licensed, verified offices across legal, engineering, business advisory, academic, and accounting services.
- Implemented an escrow payment flow where funds are held in the app's guarantee account until service completion is confirmed, protecting both clients and providers.
- Developed real-time chat with service providers, multi-provider price quote comparison, and a verified ratings & reviews system.

PregnaZone – Pregnancy Tracking & Maternal Health Application AppleStore

- Developed a pregnancy tracking app guiding expectant mothers week by week from conception to delivery, with fetal growth (weight, length) and maternal body changes.
- Implemented scheduled reminders for check-ups, vitamins, and medical follow-ups, plus medically sourced tips for handling pregnancy symptoms.
- Delivered a simple, user-friendly interface tailored to mothers at every stage of pregnancy.

G-Zone – Multi-Game Application AppleStore

- Developed a mobile application with 6 different games: Al-Fakh, Differences, Quiz Questions, Call of War, and two bounty-based custom games.
- Used WebSockets for real-time multiplayer interaction and integrated RESTful APIs for game content, user management, and leaderboards.
- Implemented Deep Linking for smooth in-app navigation and game sharing, with Clean Architecture and Cubit for a scalable, modular codebase.

Rafiqi – Hajj & Umrah Companion Application – Developed a companion app for pilgrims with daily itineraries, hotel details, documents and alerts, plus direct contact with supervisors and emergency location sharing. AppleStore

Elgazar – Butcher Management Desktop Application – Developed a Flutter desktop application that helps butchers select specific carcass parts, specify quantities in kilograms, and manage meat portions efficiently. Desktop

Ayadina – Egyptian Handicrafts Application – Built a marketplace application for Egyptian handicrafts that enables artisans to easily register and showcase their handmade products. GooglePlay | Apk

SKILLS

- **Core Concepts & Architecture:** Clean Architecture, MVVM, MVC, Dependency Injection (GetIt), Object-Oriented Programming (OOP), Data Structures & Algorithms
- **Frameworks & Languages:** Flutter, Dart, Native iOS & Android integration via Method Channels
- **State Management:** Bloc, Cubit, Provider, GetX
- **Video & Voice Calls:** Jitsi Meet, ZEGOCLOUD
- **Networking & Real-time:** RESTful APIs, Dio, HTTP, WebSockets, Socket.IO, Pusher
- **Payments & Monetization:** In-App Purchases (Android & iOS), Paymob integration via WebView and Native SDK (native code)
- **Backend Services:** Firebase Services, FCM Push Notifications, Supabase
- **Database & Storage:** Hive, SQLite (Sqflite), SharedPreferences
- **CI/CD & Version Control:** Git, GitHub, CI/CD
- **Location & Maps:** Google Maps Integration, Geolocator, Geocoding, Live Tracking
- **UI/UX:** Responsive & Adaptive Design, Animations, Custom Widgets, Localization, Deep Linking

EDUCATION

Bachelor of Computer and Control Systems Engineering
Misr Higher Institute for Engineering and Technology

LANGUAGES

- **Arabic:** Native
- **English:** Professional Working Proficiency
